

Bourdon tube pressure gauge

H 043

**For heating / sanitary applications - with self-sealing thread**

For closed heating systems.

Nominal size:	50 – 63 – 80 – 100 mm
Connection:	Brass, back or bottom NG 50 – 63 mm: G $\frac{1}{4}$ " – SW 14 NG 80 – 100 mm: G $\frac{1}{2}$ " – SW 22
Housing:	ABS black, impact-resistant and corrosion-resistant
Window:	Clip in plastic; with adjustable red pointer and green sector ( NG 80 – 100 mm)
Movement:	Brass
Pointer:	Plastic, black
Dial:	White, with red mark at 3 bar and green sector from 1.5 to 3 bar
Measuring element:	Bourdon tube element, copper alloy, "C" type bourdon tube
Measuring range: (EN 837-1/5)	0/4 bar
Accuracy: (EN 837-3/6)	NG 50 – 80 mm : class 2,5 / NG 100 mm: class 1,6
Range of application:	Static load: $\frac{3}{4}$ x scale value Alternating load: $\frac{2}{3}$ x scale value Short-time: full scale value
Operating temperature:	Environment: T <sub>min</sub> = -20°C T <sub>max</sub> = +60°C Medium: T <sub>max</sub> = +60°C
Temperature error:	Indication error when the temperature of the measuring Element deviates from +20°C: rising or falling temperature approx. $\pm 0,4\%/10$ K percentage of full scale value
Protection:	IP 32 (EN 60529)
Options:	Normal standard version  Other measuring ranges  Hydrometer NG 100 – water level indicator for standard heating systems

## Bourdon tube pressure gauge

### H 043

For heating / sanitary applications - with self-sealing thread

For closed heating systems.

HZ 50 – back connection (lower)

RF / HZ 63 – bottom connection

RF / HZ 63 – back connection (centre)

RF / HZ 80 – bottom connection

RF / HZ 80 back connection (centre)
